

## Japan Brand Program

~Lectures and demonstrations on the “UnlimitedHand”

by Dr. Emi Tamaki from H2L Cooperation/Waseda University at MIT and MassDOT ~

On February 19 2016, Dr. Emi Tamaki, Chief Researcher at H2L Cooperation and Assistant Professor at Waseda University, delivered lectures and demonstrations on the “UnlimitedHand”, the touch-sensitive game controller she created. It is performed as a part of "Japan Brand Program" implemented by The Ministry of Foreign Affairs of Japan in order to advance the brand of Japan by promoting a variety of distinct charms of Japan.

She talked about the collaboration between Japan’s manufacturing culture, cutting-edge information technology, and game culture in the lectures. The event took place at Massachusetts Institute of Technology (MIT) for game engineering researchers and students and at Massachusetts Department of Transportation (MassDOT) for general audience. The initiative allowed Dr. Tamaki to explore possibilities for creating new interactions and sales channels, such as internship application from students or joint research offer from companies.
